

**Questions on J. MacGregor Wise and Jennifer Daryl Slack, “Agency” and “Articulation and Assemblage.”**

You should know the definitions and implications of the following terms, as well as the examples used to support the authors’ claims:

Agency

“bending space” “delegation” and “translation”; “prescription” and “network”

“anthropomorphism”

the authors’ critique of Actor-Network Theory

articulation and “lines of tendential force”

assemblage

Why should we analyze the assemblage and not the “thing”?
